

Lyra Solar Powered Bollard Light

Features

- Commercial grade solar bollard
- 10 to 12 hour light output
- Warranty: 3 year warranty for faulty workmanship or component failure not influenced by external means
- Ideal for illuminating walkways at night
- Automatic light sensor turns LEDs on and off
- High quality inbuilt lithium battery
- Requires 10-12 hours initial charging prior to use
- IP65 compliant

Specifications

- |               |                          |                |   |
|---------------|--------------------------|----------------|---|
| • Colour      | Dark grey                | • Solar Panel  | 9V 7watts (220mmx 200mm)                |
| • Charge Time | 4-6 hours                | • Light Source | 36 high intensity LEDs                  |
| • CCT         | 4000K (cool white)       | • Working Time | 10-12 hours per night                   |
| • Size        | 250mmH x 240mmW base     | • Battery      | 2 x 74V/4400mah inbuilt lithium battery |
| • Brightness  | Approx. 300 lumen output | • Material     | Aluminium, polycarbonate diffuser       |

What is a Lumen?

In simple terms, Lumens are a measure of the total amount of visible light from a lamp or light source. The higher the lumen rating, the "brighter" the lamp will appear.

How does this compare with other light sources?

- Familiar examples
- A typical 4 x D cell battery maglite will emit approx. 70 lumens
  - The average Bunnings style path light using 2-3 LEDs emits 15-18 lumens
  - A 25W incandescent globe emits approximately 160 lumens

- Solar Panel
- Approx. 300 Lumen output
- Patterned light diffuser
- Concealed on / off button
- Inbuilt Lithium Battery
- Stem Diameter 140mm
- Anti corrosive aluminium body
- Bolt-down (3 fixings)

36 LEDs encased in clear light diffuser

3 x M12mm Fixings (not included)
